Day 2 (July 28)

The Eton orientation was very interesting. My favorite part was seeing the bronze statue of King Henry VI at Eton College.

What impressed me most was that there were many names and messages carved on the wall by the gate. We were also allowed to take pictures in places where people normally cannot take pictures.

During the traditional British sports activities, I felt that our friendships became stronger. My favorite game was similar to soccer, but we used a Frisbee instead of a ball. We called our teammates' names while playing, so I think it helped us become closer. (Sakamoto)

Day 2 (July 28)

Today is my first day studying at Eton College.I was very nervous because everything was new to me. I will write about what happened today.

Eton College is very beautiful.

Breakfast was potato waffles, eggs, bread, and cereal. Lunch was three bangers and mash. The bangers were big Vienna sausages, and they were delicious. Dinner was fried turkey, fried potatoes, and sweetcorn. The meals at Eton were very delicious.

The English quiz was difficult for me, but the result wasn't bad.

After lunch, I played traditional British games and sports. They were interesting. One of the games was called "SPLAT."

I had an orientation about Stonehenge. Stonehenge is huge and beautiful. The history of ancient people was exciting to me.

I'm very happy. I had a lot of fun today.(Seki)
